

Wera Advent calendar 2020

Code Nr.: 05 136601 001
EAN: 4013288211866

The Wera Advent calendar 2020 includes a mini screwdriving portable workshop for 17 different screw profiles. The two tool hand holders for sockets and bits enable the set to be used with the most important screw profiles. Includes 7 sockets, 6 bit sockets in $\frac{1}{4}$ " and 6 x 25mm bits. The 6 bits fit in the new Stubby magazine holder, with a total length of only 65 mm, which impresses as a super small screwdriving workshop. The magnet integrated in the Stubby holder is very compact and leaves the user the full range of choices, depending on the

screw profile required. The "Wobble" extension, incl. pivoting angle of 15° in all directions, allows for successful working even in hidden and very narrow working situations.

The screw set can be stored and protected in the included textile box. This box has a non-woven zone on the outside and can be easily fixed to a wall or the Wera 2go tool transport system and thanks to the included hook and loop fastener zones is super easy to attach and remove.
